Interfilling

European Beauty
Contract Filling Company
of the Year 2024

Unlocking Excellence

For over more than 10 years, we are already the number 1 trusted contract filling company.

If you either have a brand or looking for private label in the cosmetics, personal care or lifestyle products we are your reliable partner for packaging, contract filling, assembling and contract manufacturing.

[INTERFILLING.COM](https://www.interfilling.com)

Filling service

At its core, filling services involve the precise measurement and dispensing of different substances into various types of packaging.

This process requires attention to detail and strict quality control measures to ensure that each product is filled to the exact volume required. Whether it's small bottles or larger containers, the filling process needs to be done accurately and efficiently. On the next pages of this brochure you can see exactly for which types of products we are able to do the filling for you.

Get to know the ease of Interfilling by just delivering us your product and we will take care of the rest!

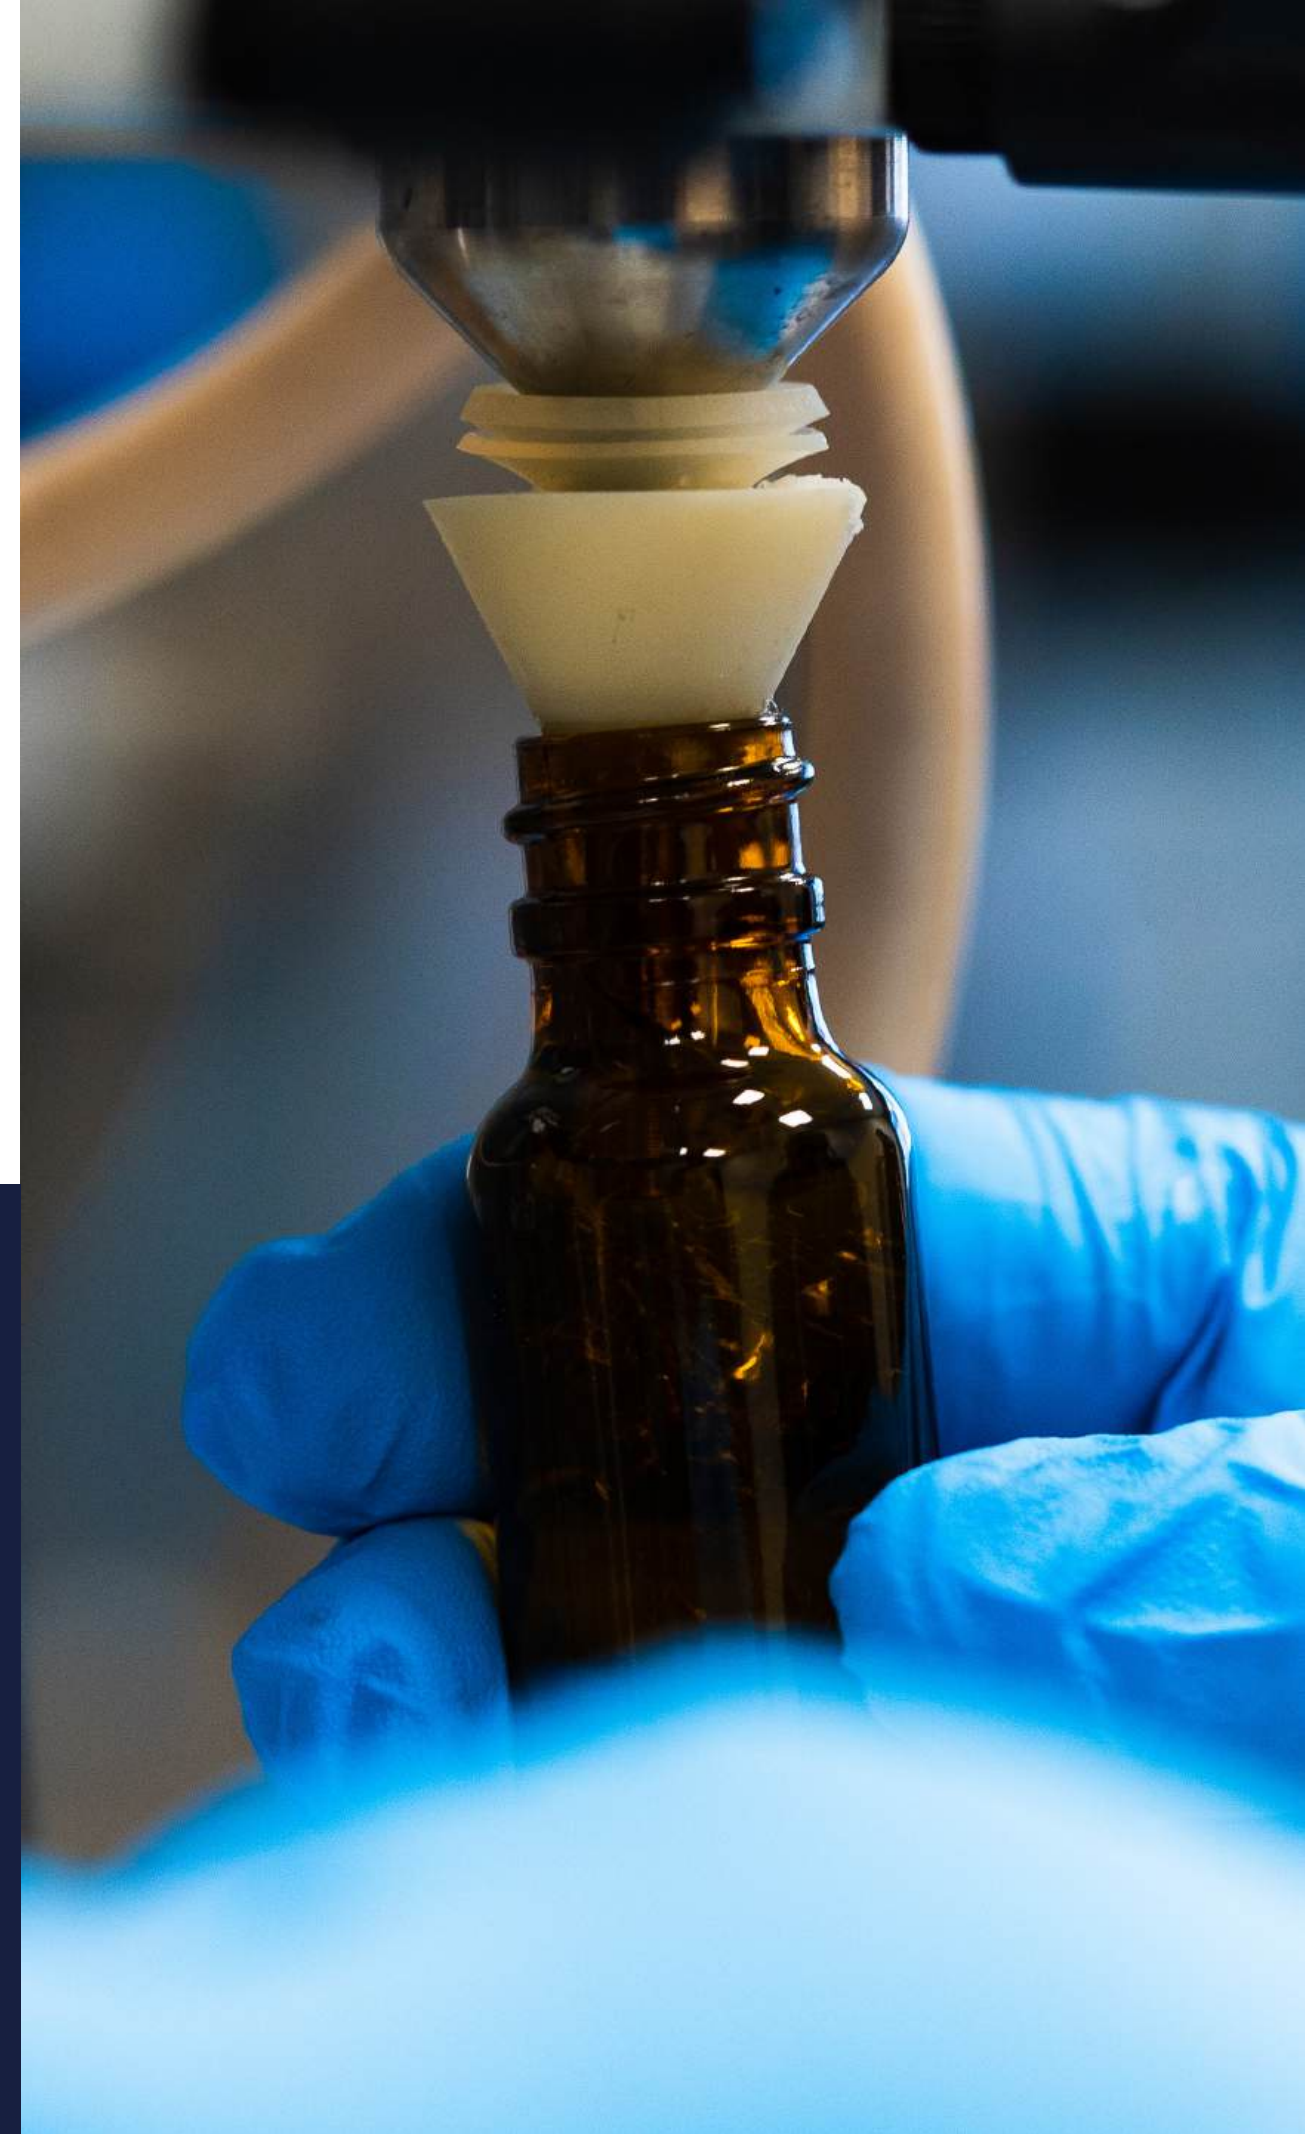

Quality Standards

Interfilling is ISO 22716 certified:
Good Manufacturing Practices (GMP) for the cosmetics manufacturing industry.

Interfilling uses a careful approach when it comes to safety, health, quality and the environment. We also have a Bio certification for packing, packaging and sorting.

LRQA: ISO 22716
NVC: Netherlands Packaging Centre

Packaging

While the quality of your products or services is undoubtedly important, the role of packaging in leaving a lasting impression on consumers should not be underestimated.

Packaging serves as the first point of contact between your product and customers, making it a powerful tool for making a positive and memorable impact. Interfilling is unique in its kind as you can either provide us with your own packaging or make a selection in the various types of packaging that we can provide you with. We offer high-quality, in-stock packaging options with durable, functional materials like PP, HDPE, glass, amber, and aluminium containers in varying sizes. Our packaging includes additional features such as pumps, droppers, and spray nozzles, giving brands the flexibility to create an appealing and cohesive product while meeting practical needs. We have a wide variety of bottles, jars and tubes. We can also provide you with some more innovative packaging, like clickpens and refillable pouches.

Embracing Sustainable Packaging

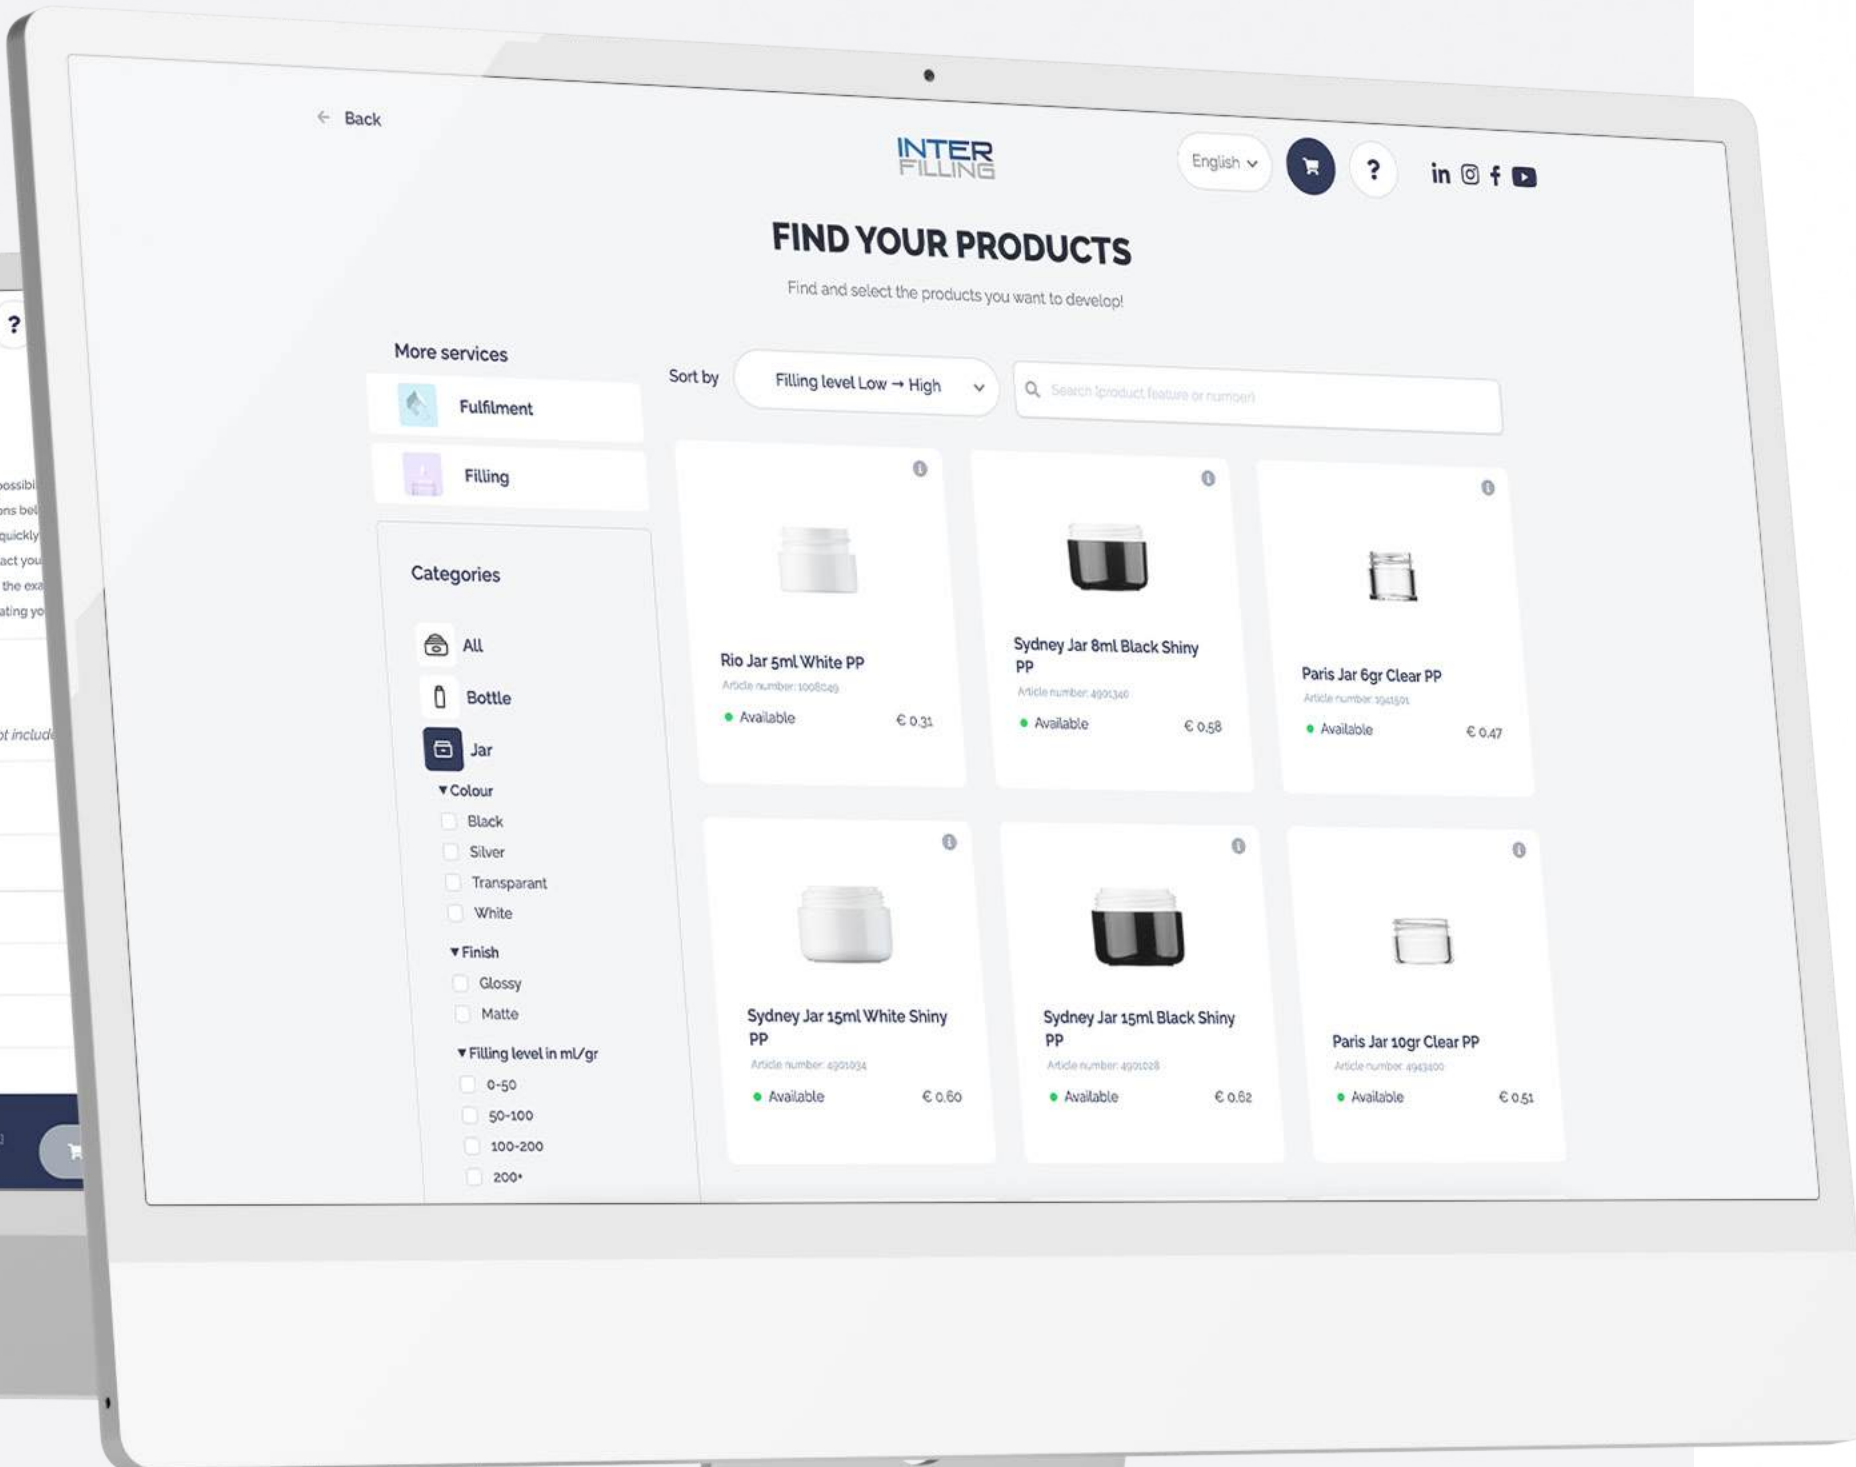

Implementing eco-friendly packaging solutions demonstrates your commitment to the environment and resonates with eco-conscious consumers.

Opt for materials that are recyclable, biodegradable, or made from renewable resources.

For example we from Interfilling offer packaging made with HDPE plastic, it stands out as an environmentally responsible choice. HDPE plastic is not only sustainable because it's made from recycled materials, but it's also recyclable, emitting no harmful fumes into the environment.

Consider options like refill packaging in the form of pouches and larger bottles to further reduce waste.

High-end Platform

On our user-friendly digital platform, you can pick, mix, and choose between the different types of high-quality packaging we offer and you can select with which substance you would like to fill them. Just scan the QR code and check it out!

Assembling / Fulfilment

One of our value added services is assembling. In combination with packaging and filling or separately, we can offer you the service to pack your products in your desired package and take care of logistics.

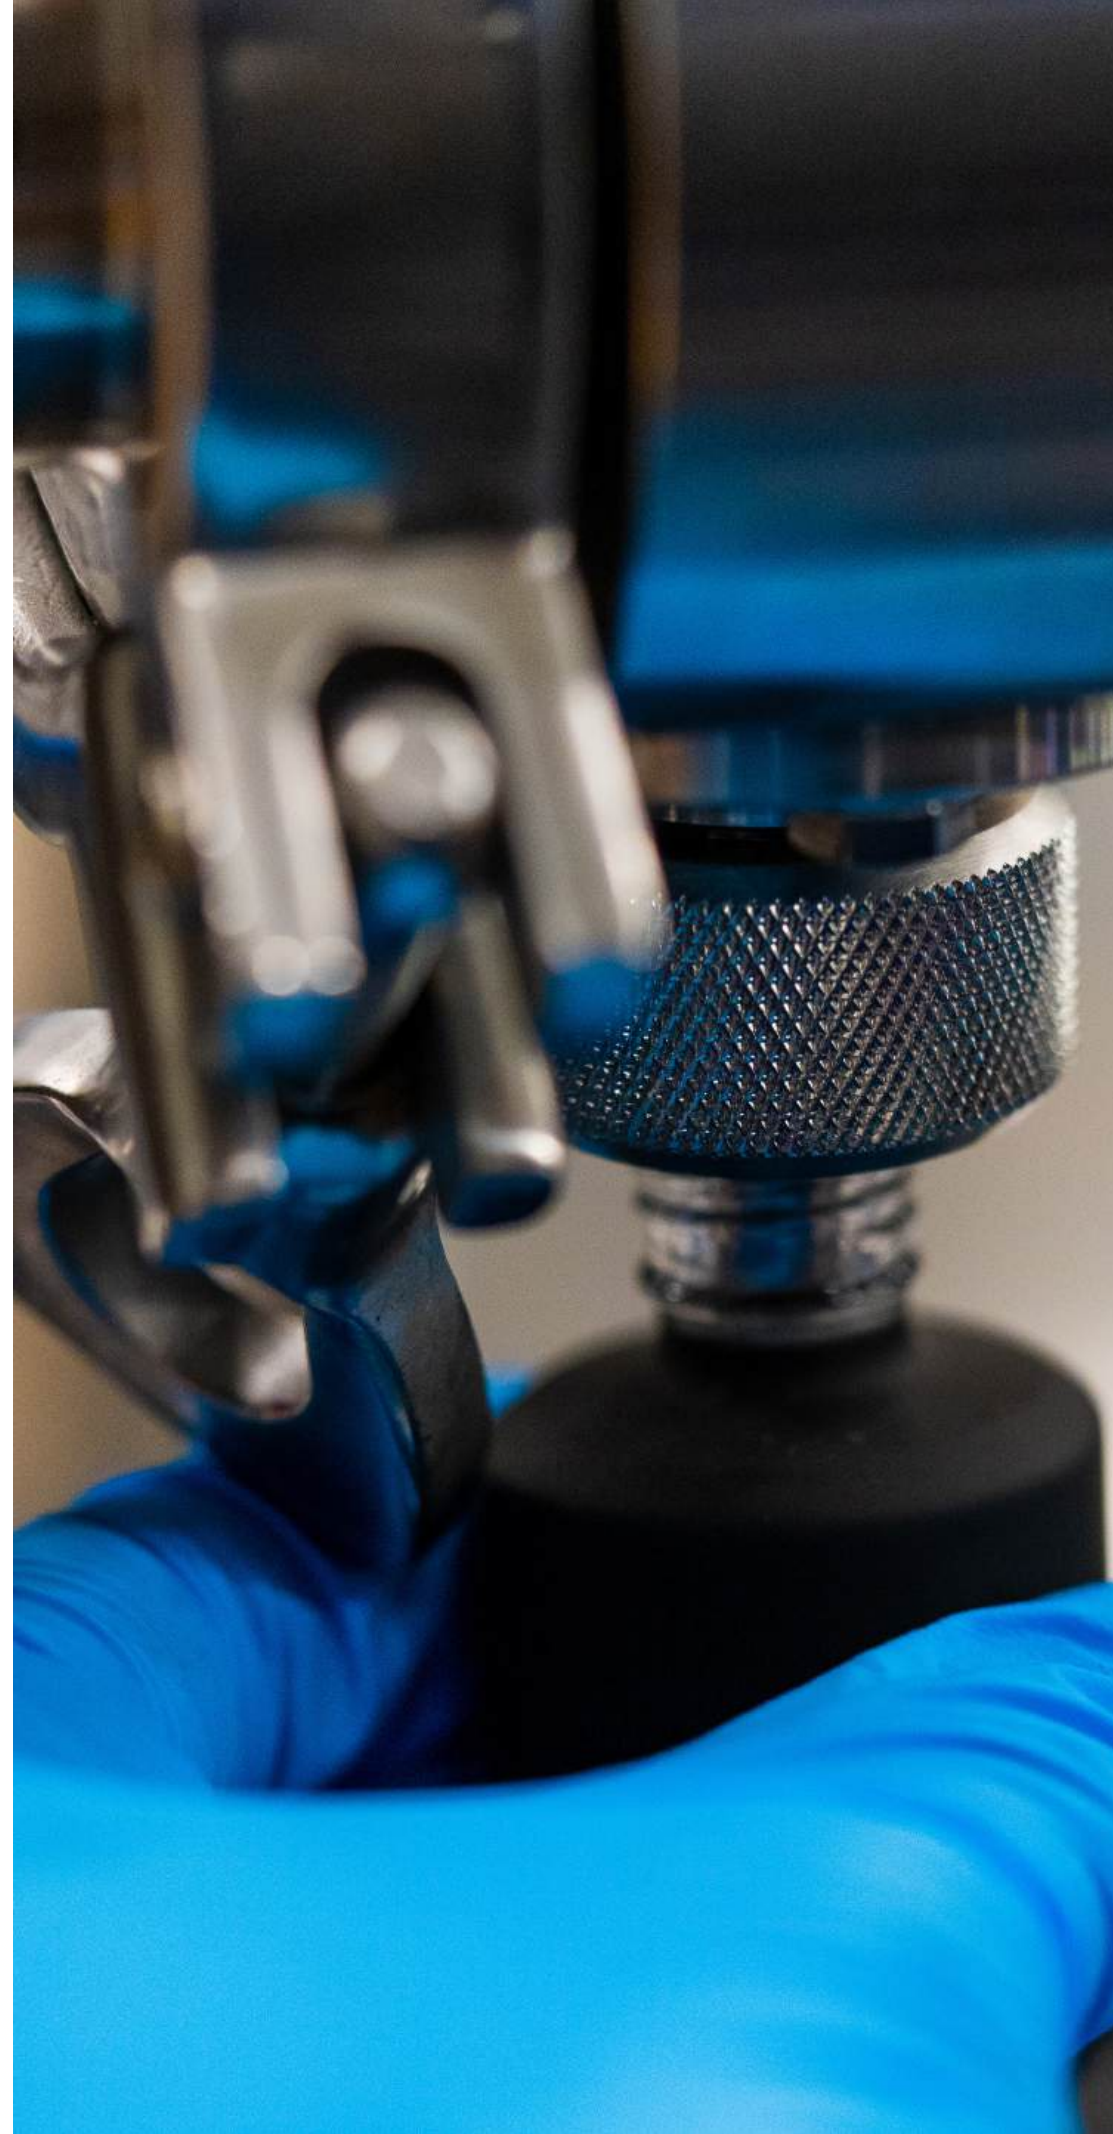

If it's regarding sealing or wrapping, special boxes, applying a label, adding a brochure or folding an outer carton, we pack and deliver your orders just the way you want and always with precision and care.

Contract Manufacturing

At Interfilling, we take pride in being leaders in contract manufacturing, specializing in the nail care industry.
